

PATIENT INFORMATION

Glucose Tolerance Test (GTT)

Please phone SA Pathology on 8222 3000 to make an appointment for this test.

Preparing for your test

This test measures how well your body uses glucose (sugar). For this test to be correct *do not change your normal eating patterns in the week prior* to the test.

Continue taking your normal medications.

You will need to fast from the night before because the test is conducted first thing in the morning.

If you work night shift we can arrange a time that suits you.

If you have had weight loss surgery it is advised that you check with your doctor before starting this test. There is a risk of dumping syndrome and/or reactive hypoglycaemia. Please advise the staff if you have had this surgery.

Please follow these instructions carefully

1. You *must* fast for 10 hours before the test.
(maximum fasting time is 16 hours)
2. Your appointment will usually be around 9.00am, this means *nothing to eat* from 11.00pm the night before. You may *drink water only*.
3. Smoking can affect your blood sugar level – *do not smoke*.
4. On the morning of the test drink several glasses of water to prevent dehydration.
5. Stressful activities can alter your blood sugar level so you must rest throughout the test period.
It is advised not to exercise 10-12 hours prior to the test.

Having your test

1. The test takes about 2½ hours. You must stay in the Patient Centre for the length of the test, so you may wish to bring something to read.
2. You will need to drink a glucose solution after which several blood samples will be collected for testing.
3. You may *drink water only* during the test.

Your results

Your doctor will advise you when your results are available.
